OptumRx Communication

Refill-Too-Soon COVID-19 Response Policy Extension

To meet the clinical needs of our members and comply with applicable CDC guidance, as well as Federal, State and Local government requirements, OptumRx Clinical Affairs is extending the Refill Too Soon edit policy beyond the original expiration date. This policy will be extended an additional 30 days until March 31st, 2021.

OptumRx's policy includes the following:

- OptumRx members with active eligibility may obtain an early one-time refill of their prescription medications if they have refills remaining on file at a participating retail or mail-order pharmacy
- The refill obtained will stay consistent with the standard days supply previously filled by the member as allowed by their plan (e.g., 30 or 90 day supply).
- This refill too soon waiver will be continuously evaluated to determine the appropriate duration based on CDC guidance, Federal and State declarations, and other relevant data.
- This policy is in effect for all regions and states covered by OptumRx.

OptumRx is continuing to monitor the COVID-19 situation and take the appropriate steps to ensure your members have continued access to their medications.
